Sequence 1687, Application US/60161932
GENERAL INFORMATION:
APPLICANT: Venter, J. Craig
TITLE OF INVENTION: The Drosophila Genome, Primary Nucleic
TITLE OF INVENTION: Acid Sequences, Systems Containin the Nucleic Acid Sequences
TITLE OF INVENTION: Acid Sequences, Systems Containin the Nucleic Acid Sequences
TITLE OF INVENTION: Acid Sequences, Systems Containin the Nucleic Acid Sequences
CURRENT APPLICATION NUMBER: US/60/161,932
CURRENT APPLICATION NUMBER: US/60/161,932
CURRENT FILING DATE: 1999-10-28
NUMBER OF SEQ ID NOS: 2626
SOFTWARE: FastSEQ for Windows Version 4.0
SEQ ID NO 1687
LENGTH: 507
                                                                                                                                                                                                                                                    Sequence 7674, Application US/10446203
SERERAL INFORMATION:
APPLICANT: Gary Breton et. al.
TITLE OF INVENTION: NUCLEIC ACID AND AMINO ACID SEQUENCES RELATING TO KLEBSIELLA
TITLE OF INVENTION: DEBUNDANIAE FOR DIAGNOSTICS AND THERAPEUTICS
FILE REFERENCE: 2709.2004001

TITLE OF INVENTION: Streptococcus pyogenes
TITLE OF SEQUENCES: 16
CORRESPONDENCE ADDRESS: ZIP: 91001
COMPUTER READABLE FORM:
MEDIUM TYPE: Floppy disk
COMPUTER: IBM PC compatible
OPERATING SYSTEM: PC-DOS/MS-DOS
SOFTWARE: Patentin Release #1.0, Version #1.25 AUDRESSEE: Sheldon & Mak STREET: 225 South Lake Avenue, Ninth Ploor CITY: Pasadena STATE: California CLASSIFICATION:
PRIOR APPLICATION DATA:
APPLICATION NUMBER:
ILING DATE: 23-UNE-193
ATTORNEY/AGENT INFORMATION:
NAME: Farber, Michael B.
REGISTATION NUMBER: 32,612
REFERENCE/DOCKET NUMBER: 9521
TELECOMMUNICATION INFORMATION:
TELECOMMUNICATION (818) 796-4000 CURRENT APPLICATION DATA:
APPLICATION NUMBER: US/10/453,032
FILING DATE: 03-JUNE-2003 ORGANISM: Streptococcus pyogenes (genomic) TELEFAN. (818) 795-6321 INFORMATION FOR SEQ ID NO: 3 SEQUENCE CHARACTERISTICS: LENGTH: 940 base pairs TYPE: nucleic acid STRANDEDNESS: double Matches 925; Conservative MOLECULE TYPE: DNA Query Match Best Local Similarity USA ANTI-SENSE: NO ORIGINAL SOURCE US-10-453-032-11 COUNTRY: 183 61 303 181 363 423 d à

GENERAL INFORMATION:
APPLICANT: Adams, Craig W.
APPLICANT: Belei, Marina
TITLE OF INVENTION: Recombinant DNase B Derived from
TITLE OF INVENTION: Screptococcus pyogenes
NUMBER OF SEQUENCES: 16
CORRESPONDENCE ADDRESS:
ADDRESSEE: Sheldon & Mak
STREET: 225 South Lake Avenue, Ninth Floor
MEDIUM TYPE: Floppy disk
COMPUTER: IBM PC compatible
OPERATING SYSTEM: PC-DOS/MS-DOS
SOFTWARE: Patentin Release #1.0, Version #1.25
CURRENT APPLICATION DATA:
APPLICATION NUMBER: US/08/482,785
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   ALIGNMENTS
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              COUNTRY: USA

GENERAL INFORMATION:
APPLICANT: Adams, Craig W.
APPLICANT: Belei, Marina
TITLE OF INVENTION: Recombinant DNase B Derived from
TITLE OF INVENTION: Streptococcus pyogenes
NUMBER OF SEQUENCES: 16
CORRESPONDENCE ADDRESS:
ADDRESSEE: Sheldon & Mak

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

GENERAL INFORMATION:
APPLICANT: Adams, Craig W.
APPLICANT: Belei, Marina
TITLE OF INVENTION: Streptococcus pyogenes
ITLE OF INVENTION: Streptococcus pyogenes
NUMBER OF SEQUENCES: 16
CORRESPONDENCE ADDRESS:
ADDRESSEE: Sheldon & Mak
STRET: 225 South Lake Avenue, Ninth Floor
CITY: Peadena
STATE: California

No. is the number of results predicted by chance to have a
score greater than or equal to the score of the result being printed,
and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                             1220
